

## Develop a Written Safety Plan

Fred Miller of the Montana Safety and Health Bureau will be coming to the Flathead Job Service on a quarterly basis to assist employers with developing a written safety plan. The next session is **January 8<sup>th</sup>, 2014** and you will be able to complete and leave with a written safety plan in about an hour.

Having a written safety plan will:

- Help reduce workplace injuries
- Improve productivity
- Save you money to grow the bottom line.

Fred will implement the Safety Writer program for those wanting to develop a written safety plan. He will bring some laptops for your use and you will need to bring a thumb drive to save your written plan, or you can bring your own laptop with wireless capability.

- It will be extremely helpful before attending to bring your SIC (Standard Industrial Classification) codes with you. You can get your SIC code by calling your commercial insurance agent.

**Facilitator: Fred Miller** of the Montana Safety & Health Bureau marketed workers' compensation insurance to large and small Montana businesses for more than 12 years. Along the way, he learned why it's so important to make safety a top priority, and how implementing a safety culture dramatically impacts the bottom line. Also, he reviews workers' compensation group rated plans, and offers tips for further reductions in work comp premiums.

**Dates**                **January 8, 2014**
